Footnotes:

1. A maximum of two inspections are provided per permit. Additional inspections will be subject to Trip Fee assessment.
2. Service and feed must be inspected together when using this fee. Inspections at different times requires a ~~\$54.00~~ \$56.00 fee for each inspection.
3. Scope of work is limited to wind, weather, vehicular or terminal failure damage to existing systems. May also include the repair or replacement of the mast, meter and conductors up to the first point of termination on the service or building disconnecting means. Relocated meters or masts and overhead-underground conversions shall be evaluated as altered services.
4. Altered or added circuits calculated per panelboard.
5. Service and feed must be inspected together when using this fee. Inspections at different times requires the Service Fee plus additional fee calculated Commercial Additional Feeders fee.
6. All field installed power transformers that are the source of a separately derived system shall have both their primary and secondary feeds identified/fee valued. All multi-section lighting and appliance branch circuit panelboards shall have each section evaluated/fee valued. All feeder taps that terminate in an overcurrent device rated 30 amps or larger shall be identified/fee valued.
7. Multiple section switch boards that have continuous, full ampacity bussing between sections shall be fee valued as single feeders. Switchboard subsections that have reduced ampacity bussing and individual overcurrent protection for the section shall be evaluated as additional feeders.
8. Service and feed must be inspected together when using this fee. Inspections at different times requires an additional fee per the Service and Fee schedule.

9. Low voltage and telecommunications systems includes all telecommunication systems, fire alarms, burglar alarms, nurse call, intercom, security systems, energy management controls, HVAC/refrigeration control, industrial and automation control systems, lighting controls, stand alone sound systems, public address and similar low energy circuits and equipment in all occupancy except one and two family dwellings as regulated by the International Residential Code. Multiple low-voltage systems installed by a single contractor at a single address and ready for a single inspection, may be fee valued at one fee.

10. Service or feeder equipment installed exclusively to power a sign shall be fee valued at the Commercial Industrial Service fee schedule.

11. Multiple sign faces and enclosures mounted on the same structure, each disconnecting means or set of disconnects to a separate enclosure shall be considered an individual sign. For outline lighting, neon channel letters and skeletal neon lighting, a sign will be defined as the sign transformer or power supply fed by a primary sign circuit.

12. Permanently installed generators shall be fee valued under the appropriate residential or commercial service/feeder schedule.

13. For commercial and industrial location employing full-time electrical maintenance staff or having a yearly maintenance contract with a licensed electrical contractor. All yearly maintenance contracts must detail the number of contract electricians necessary to do the work required under the contract. This number will be used for calculating the fees. Each inspection is based on a 2 hour maximum. Annual permits are valid for inspection at one facility (site) only.

14. The electrical permit fee shall be the calculated fee per the fee table or the minimum fee, whichever is greater, except Trip Fees which will be calculated from the fee schedule.

8. Other inspection and service fees.

A. Other inspections outside of the normal business hours (eight a.m./five p.m.) shall be a

minimum fee of \$276.00 per inspector providing a maximum of two hours of inspection per trip. Additional consecutive hours of inspection are \$138.00 per hour per inspector. Inspector is defined as a Building Inspector, Electrical Inspector and/or a Deputy Fire Marshal.

B. Re-inspection fees when required shall be \$138.00 per hour, with a minimum of \$69.00 per

inspection.

C. Inspections for which no fee is established shall be \$138.00 per hour, with a minimum of \$69.00

per inspection.

D. Additional plan review time required due to changes or revisions to already approved construction documents and plans shall be calculated at \$138.00 per hour, but shall not exceed an amount

equal to the original plan check fee. Major revisions to construction documents or plans after approval or during plan review shall require a new plan review fee.

E. There shall be a \$28.00 issuance fee added for each permit identified in Tables I (Building Permit Fees), VI (Grading and Erosion Control Permit and Plan Review Fees), and VII (Fire Fees).

F. Permit fees not clearly defined by this section, or fees that are found by the building official

and/or fire code official to be inequitable using a valuation base, shall be determined by the building official and/or fire code official by using a rational cost-of-service analysis. Fee determinations in such cases shall be made available to the public and disseminated to the applicable segments of the construction industry for use in future such cases.

G. Expiration date extension fee. A fee of \$26.00 shall be assessed to process a permit expiration

date extension request.

H. Early start permit fee. When the applicant requests an early start permit approval, a fee of

\$138.00 per staff review hour, one hour minimum, plus a \$28.00 issuance fee shall be assessed.

I. Fee refunds. Requests for fee refunds must be made in writing by the permittee. The building

official and/or fire code official may authorize refund of a fee paid as follows:

1. Refunding of not more than 80 percent of the permit fee paid when no work has commenced

under a permit issued in accordance with this code.

2. Authorize refunding of not more than 80 per cent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any examination time has been expended.

3. There shall be no refunding of any fee paid except upon written application filed by the original applicant not later than 180 days after the date of fee payment. Limited trade work permit fees are not refundable.

J. Re-inspection/Trip Fees. A re-inspection/trip fee may be assessed for each inspection or

re-inspection when such portion of work for which inspection is called for is not complete or when corrections called for are not made.

1. Re-inspection/trip fees are designed to discourage the practice of calling for inspections

before the job is ready for such inspection or re-inspection.

2. Re-inspection/trip fees may also be assessed under the following circumstances:

work site.

- a. When the inspection record card and permit is not posted or otherwise available on the
- b. When approved plans are not readily available to the inspector for failure to provide access

on the date the inspection is scheduled.

c. When there is deviation from the approved plans.

d. When required corrections have not been completed upon request for re-inspection.

e. When the cost per hour of inspection or re-inspection has exceeded the permit fee paid.

A minimum of three inspections per category are allowed for all "single permit fee" permits.

3. The permittee or their designated agent shall pay the required fee as set forth in the fee schedule and noted in the re-inspection/trip fee notice.

4. In instances where re-inspection/trip fees have been assessed, additional inspection of the

work will not be performed until the required fee has been paid.

5. Reinspection/trip fees will be assessed on Electrical, Plumbing and Mechanical Permits where the number of requested inspections exceeds two. Re-inspections fees may be assessed on all other permits where the number of requested inspections in a required inspection category exceeds three. See VMC 17.08.090(G) for limited trade re-inspection fee requirements.

K. Work commencing before permit issuance. Any person who commences any work on a

building, structure, electrical, gas, mechanical, plumbing system, fire sprinkler, fire alarm system and/or other fire code permits before obtaining the necessary permits shall be subject to an investigation fee established by the building official and/or fire code official in addition to the required fees as set forth in this code.

1. The investigation fee for work commencing before permit issuance shall be the same as the required permit fees contained in the fee tables.
2. The investigation fee shall be paid prior to or at the time of the permit issuance.
3. The payment of the investigation fee shall not exempt an applicant from compliance with all

provisions of the Vancouver Municipal Code or other applicable laws.

VMC.

4. Such investigation fees may be in addition to any other penalty assessed under title 22 of the

Footnotes:

1. Trip fees are intended to recover actual costs and may be assessed where the requested inspections are for work that is not ready for inspection, the work is not accessible for inspection, or the appropriate personnel or documentation is not on site.

8. Other inspection and service fees.

A. Other inspections outside of the normal business hours (eight a.m./five p.m.) shall be a minimum fee of \$276.00 per inspector providing a maximum of two hours of inspection per trip. Additional consecutive hours of inspection are \$138.00 per hour per inspector. Inspector is defined as a Building Inspector, Electrical Inspector and/or a Deputy Fire Marshal.

B. Re-inspection fees when required shall be \$138.00 per hour, with a minimum of \$69.00 per inspection.

C. Inspections for which no fee is established shall be \$138.00 per hour, with a minimum of \$69.00 per inspection.

D. Additional plan review time required due to changes or revisions to already approved construction documents and plans shall be calculated at \$138.00 per hour, but shall not exceed an amount equal to the original plan check fee. Major revisions to construction documents or plans after approval or during plan review shall require a new plan review fee.

E. There shall be a \$28.00 issuance fee added for each permit identified in Tables I (Building Permit Fees), VI (Grading and Erosion Control Permit and Plan Review Fees), and VII (Fire Fees).

F. Permit fees not clearly defined by this section, or fees that are found by the building official and/or fire code official to be inequitable using a valuation base, shall be determined by the building official and/or fire code official by using a rational cost-of-service analysis. Fee determinations in such cases shall be made available to the public and disseminated to the applicable segments of the construction industry for use in future such cases.

G. Expiration date extension fee. A fee of \$26.00 shall be assessed to process a permit expiration date extension request.

H. Early start permit fee. When the applicant requests an early start permit approval, a fee of \$138.00 per staff review hour, one hour minimum, plus a \$28.00 issuance fee shall be assessed.

I. Fee refunds. Requests for fee refunds must be made in writing by the permittee. The building official and/or fire code official may authorize refund of a fee paid as follows:

1. Refunding of not more than 80 percent of the permit fee paid when no work has commenced under a permit issued in accordance with this code.

2. Authorize refunding of not more than 80 per cent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any examination time has been expended.

3. There shall be no refunding of any fee paid except upon written application filed by the original applicant not later than 180 days after the date of fee payment. Limited trade work permit fees are not refundable.

J. Re-inspection/Trip Fees. A re-inspection/trip fee may be assessed for each inspection or re-inspection when such portion of work for which inspection is called for is not complete or when corrections called for are not made.

1. Re-inspection/trip fees are designed to discourage the practice of calling for inspections before the job is ready for such inspection or re-inspection.

2. Re-inspection/trip fees may also be assessed under the following circumstances:  
work site.

a. When the inspection record card and permit is not posted or otherwise available on the

b. When approved plans are not readily available to the inspector for failure to provide access on the date the inspection is scheduled.

c. When there is deviation from the approved plans.

d. When required corrections have not been completed upon request for re-inspection.

e. When the cost per hour of inspection or re-inspection has exceeded the permit fee paid. A minimum of three inspections per category are allowed for all "single permit fee" permits.

3. The permittee or their designated agent shall pay the required fee as set forth in the fee schedule and noted in the re-inspection/trip fee notice.

4. In instances where re-inspection/trip fees have been assessed, additional inspection of the work will not be performed until the required fee has been paid.

5. Reinspection/trip fees will be assessed on Electrical, Plumbing and Mechanical Permits where the number of requested inspections exceeds two. Re-inspections fees may be assessed on all other permits where the number of requested inspections in a required inspection category exceeds three. See VMC 17.08.090(G) for limited trade re-inspection fee requirements.

K. Work commencing before permit issuance. Any person who commences any work on a building, structure, electrical, gas, mechanical, plumbing system, fire sprinkler, fire alarm system and/or other fire code permits before obtaining the necessary permits shall be subject to an investigation fee established by the building official and/or fire code official in addition to the required fees as set forth in this code.

1. The investigation fee for work commencing before permit issuance shall be the same as the required permit fees contained in the fee tables.

2. The investigation fee shall be paid prior to or at the time of the permit issuance.

3. The payment of the investigation fee shall not exempt an applicant from compliance with all provisions of the Vancouver Municipal Code or other applicable laws.

VMC.

4. Such investigation fees may be in addition to any other penalty assessed under title 22 of the (M-4052, Amended, 06/03/2013, Sec 7-Effective 07/01/2013; M-4034, Amended, 12/03/2012, Sec 40-Effective 01/03/2013;
